

Meeting 29

4/19 - 6:30pm

Attendance: Nova, Zion, Matt, Nathan, Nate, Nick

We discussed the necessary components needed to finish the project. We decided on three main goals: Cleaning up the website appearance on mobile, updating the athlete profile pages, and displaying database information on that athlete page. Priority in that order. The website appearance on mobile will require a new navigation bar as well as a revamp of the home/conference page. We will ask Abbey and Ethan their opinion on how to merge those pages. Nick will take charge of updating the athlete profile pages while everyone else works on the database info.
