

Meeting 11

11/2 - 6:30pm

Attendance: Nova, Zion, Matt, Nicholas

We have decided to start from scratch rather than use Caedin's codebase. It will take too much time figuring out how to read what they wrote. That time would be spent better working on a new codebase written from scratch.

We also went over our Figma prototype. Nova started one as a template, we need to work on expanding it. Since we are starting from scratch, we want to make sure our vision lines up with what Abbey wants. We will work on having a fleshed out figma prototype over the next 2 weeks.
