

Meeting 22

3/1 - 6:30pm

Attendance: Nova, Zion, Matt, Nathan, Nate, Nick

Zion reordered the entire github directory so that all of the files are properly created under an EJS format. She reordered the navbar so that it is uniform across all of the pages. Nate and Matt were also able to run and insert queries into the local database. Nick and Nova worked on the footer. Our objectives for this week are to expand the front end functionality.
