Meeting 21
2/22 - 6:30pm
Attendance: Nova, Zion, Matt, Nathan, Nate, Nick

Nate and Matt connected a database to NodeJS. We were also able to get the Heroku information resolved on Abbey's account. Nathan, Zion and Nova have been working on the main page and will continue to update to make it appear more like the figma prototype. We've been running into issues with getting images to load locally, and our temporary solution is to upload them to google photos under the StudioToStadium drive account.
