Meeting 28
4/12 - 6:30pm
Attendance: Nova, Zion, Matt, Nathan, Nate, Nick

Nathan and Matt spent the weekend attempting to get the website on AWS Cloud Services, Github Pages and Google Web Cloud Services. We had no luck. During the meeting, we researched a site called Render, and within a half hour or so we were able to get the site up! The only issue is that we've been running into Google Chrome errors saying that the website is unsafe and shouldn't be visited. We are also getting this error on other web browsers. We are unsure how to fix this, so we are meeting with Julie tomorrow to get this resolved.
