Meeting 19
2/8 - 6:30pm
Attendance: Nova, Zion, Matt, Nathan, Nate, Nick

Now that the Heroku account has been set up, we divided up tasks on where to continue the project. We decided it would be best for Nate, Matt and Nick to work on the backend while Nathan, Zion and Nova work on the front end. Nova Zion had already begun work on some of the basics, like the navigation bar and main page. For this week we decided to continue working on adding new pages while the back end team began research on how to set up a database.
