Meeting 25
3/22 - 6:30pm
Attendance: Nova, Zion, Matt, Nathan, Nate, Nick

We figured out how to pull directly from the database onto the front end of the website. Nova was able to figure out how to take our user_id, email, name, phone number and every other attribute in the database onto the athlete profile page. We also decided to increment the user id by one to indicate the index of the profile created. Up next is figuring out how to get images to load into the front end.
